Introduction

This report provides summary of assessment by final year MBBS students on teaching/learning methods in PIMS. A Google form was used to get responses on 29 items relating to teaching/learning methods that were adopted in the following seven departments: General medicine, General surgery, OBG, Paediatrics, Orthopedics, ENT, and Ophthalmology. A five point Likert scale (very bad, bad, satisfactory, good, excellent) was used to rate the items. There were 86 responders. The respondents were divided in to three groups based on their Internal Assessment (IA). This report is based on students whose IA was more than 50%. Among the responders, there were 36 such students. This report is based on their responses. The responses were analysed and presented as bar charts. Suggestions provided by them for the improvement were given in Appendix.

Results

A. Teaching/learning

1. Arousal of Interest

Figure 1. Distribution of responses on arousal of interest

2. Clarity of Communication

2. Clarity of Communication

Figure 2. Distribution of responses on Clarity of Communication

3. Adequate Interaction

3. Adequate Interaction

Figure 3. Distribution of responses on Adequate Interaction

4. Approachability

4. Approachability

Figure 4. Distribution of responses on Approachability

5. Punctuality - Starting on time

5. Punctuality - Starting on time

Figure 5. Distribution of responses on Punctuality - Starting on time

6. Punctuality - Ending on time

6. Punctuality - Ending on time

Figure 6. Distribution of responses on Punctuality - Ending on time

7. Visual aids - Appropriate

7. Visual aids - Appropriate

Figure 7. Distribution of responses on Visual aids - Appropriate

8. Visual aids - Clarity

8. Visual aids - Clarity
